

# Diving Board

## Update

A regular monthly inspection was done on the diving board on March 23rd, 2022. The staff discovered that the non-slip grit on the board was beginning to wear at the board's end, making it unsafe for patrons to use.

The board was removed from the stand, and further inspection was completed. A crack was then discovered on the underside of the board, turning the project into a full replacement as opposed to a quick repair.

A new board and stand have been ordered, and are expected to ship from the manufacturers on August 6th, 2022. We have not been provided with an arrival date, but we are planning to install the new board during September Shutdown.
